PUNJAB NATIONAL BANK
Pillar 3 Disclosures under Basel III Framework
For 30.09.2022

(CONSOLIDATED)

Table DF-1: Scope of Application

Qualitative Disclosures:

Top bank in the group

Punjab National Bank (herein after referred to as the 'Bank') is the top bank in the group to which the Capital Adequacy Framework under Basel III applies. The Bank has three domestic and two international subsidiaries, which together constitute the Group in the context of Consolidated Financial Statements (CFS).

The Bank has three domestic subsidiaries, namely:

i) PNB Gilts Ltd.
ii) PNB Investment Services Ltd.
iii) PNB Cards and Services Ltd.*

The Bank has two international subsidiaries, namely:

i) Punjab National Bank (International) Limited (PNBIL), UK
ii) Druk PNB Bank Ltd., Bhutan

*However, PNB Cards and Services Ltd. has not been considered for Consolidated Financial Statements (CFS) as per Reserve Bank of India (RBI) Basel III guidelines as the same does not fall under the Scope of regulatory consolidation.

Note: PNB Insurance Broking Pvt. Ltd. is non-functional, the Broking license has been surrendered, capital stands extinguished and liquidator shall be completing the necessary formalities to conclude the winding up procedure.

The Bank is not directly involved in insurance activity. However, Bank has invested in the share capital in the following insurance related Subsidiaries/Associates.

S. No.	Name of the company	Country of Incorporation	Status	Proportion of ownership
1.	PNB MetLife India Insurance Company Ltd.	India	Associate	30 %
2.	Canara HSBC Oriental Bank of Commerce Life Insurance Co. Ltd.	India	Associate	23 %

PUNJAB NATIONAL BANK
Pillar 3 Disclosures under Basel III Framework
For 30.09.2022

a. List of group entities considered for consolidation

(i) All the group entities as mentioned above are considered for consolidation under accounting scope of consolidation.

(ii) All the subsidiaries except associates/JVs, insurance and non-financial subsidiaries as mentioned above are considered for consolidation under regulatory scope of Consolidation. Regulatory scope of consolidation refers to consolidation in such a way as to result in the assets of the underlying group entities being included in the calculation of consolidated risk- weighted assets of the group.

Name of the entity & Country of incorporation	Whether the entity is included under accounting scope of consolidation (Yes/No)	Method of consolidation	Whether the entity is included under regulatory scope of consolidation (Yes/No)	Method of consolidation	Reasons for difference in the method of consolidation	Reasons for consolidation under only one of the scopes of consolidation
PNB Gilts Ltd.(India)	Yes	Consolidated in accordance with AS-21, Consolidated Financial Statements	Yes	Consolidated in accordance with AS-21, Consolidated Financial Statements	Not applicable	Not applicable
PNB Investment Services Ltd. (India)						
Punjab National Bank (International) Ltd. (U.K.)						
Druk PNB Bank Ltd (Bhutan)						
PNB Cards and Services Ltd. (India)			No	Not applicable	Not applicable	Non-Financial Subsidiary: Not under the Scope of regulatory Consolidation

Druk PNB Bank Ltd. (Bhutan)	Banking	2491.65	24283.31

d. Capital deficiency in subsidiaries

There is no capital deficiency in the subsidiaries of the Bank as on 30th September 2022.

e. The aggregate amounts (e.g. current book value) of the bank's total interests in insurance entities, which are risk-weighted:

Rs. in millions

Name of the Insurance entities / country of incorporation	Principle activity of the entity	Total balance sheet equity (as per accounting Balance sheet of the legal entity) as on 30.09.2022	% of bank's Holding in the Total equity / Proportion of voting power	Quantitative Impact on regulatory capital of using risk weighting method versus using the full deduction method
Canara HSBC Oriental Bank of Commerce Life Insurance Co. Ltd (India)	Life Insurance/ Bancassurance	12152.05	23%	Risk weight up to the value of investment
PNB Metlife India Insurance Company Ltd (India)	Life Insurance/ Bancassurance	20252.15	30%	Risk weight up to the value of investment

f. Any restrictions or impediments on transfer of funds or regulatory capital within the banking group is as governed by RBI.

Table DF-2: Capital Adequacy

Qualitative Disclosures:
(a)
1. Capital Adequacy

The bank believes in the policy of total risk management. The bank views the risk management function as a holistic approach whereby risk retention is considered appropriate after giving due consideration to factors such as specific risk characteristics of obligor, inter relationship between risk variables and corresponding return and achievement of various business objectives within the controlled operational risk environment. Bank believes that risk management is one of the foremost responsibilities of top/ senior management. The Board of Directors decides the overall risk management policies and approves the Risk Management Philosophy & Policy, Credit Management & Risk policy, Investment policy, ALM policy, Operational Risk Management policy, Policy for internal capital adequacy assessment process (ICAAP), Credit Risk Mitigation & Collateral Management Policy, Stress Testing Policy and Policy for Mapping Business Lines/Activities, containing the direction and strategies for integrated management of the various risk exposures of the Bank. These policies, inter alia, contain various trigger levels, exposure levels, thrust areas etc.

The bank has constituted a Board level subcommittee namely Risk Management Committee (RMC). The committee has the overall responsibility of risk management functions and oversees the function of Credit Risk Management Committee (CRMC), Asset Liability Committee (ALCO), Market Risk Management Committee (MRMC) and Operational Risk Management Committee (ORMC). The meeting of RMC is held at least once in a quarter. The bank recognizes that the management of risk is integral to the effective and efficient management of the organization.

2. Credit Risk Management

2.1.1 Credit Risk Management Committee (CRMC) headed by MD & CEO is the top-level functional committee for Credit risk. The committee considers and takes decisions necessary to manage and control credit risk within overall quantitative prudential limit set up by Board. The committee is entrusted with the job of approval of policies on standards for presentation of credit proposal, fine-tuning required in various models based on feedbacks or change in market scenario, approval of any other action necessary to comply with requirements set forth in Credit Risk Management Policy/ RBI guidelines or otherwise required for managing credit risk.

2.1.2 In order to provide a robust risk management structure, the Credit Management and Risk policy of the bank aims to provide a basic framework for implementation of sound credit risk management system in the bank. It deals with various areas of credit risk, goals to be achieved, current practices and future strategies. As such, the credit policy deals with short term implementation as well as long term approach to credit risk management. The policy of the bank embodies in itself the areas of risk identification, risk measurement, risk grading techniques, reporting and risk control systems / mitigation techniques and documentation practice.

Zonal Risk Management Cells (ZRMCs) have been set up at zonal level as an extended arm of HO: IRMD to inculcate risk culture at field level in line with Risk Philosophy of the Bank. The new risk assessment structure focuses on complete segregation of credit risk assessment system from credit underwriting by centralizing the risk rating process parallel to Zonal Level under direct control of Integrated Risk Management Division at Head Office, whereas the credit delivery system shall continue through business delivery structure of credit verticals and zones. The segregation of processes had been introduced to create an independent efficient risk assessment and third eye view based calculation of risk over a borrowing entity.

For better support, control & transparent structure of reporting, organization structure in the bank has been revamped. In this regard, bank has introduced specialized lending branches for catering to loans from Rs 10 lacs to Rs 1 Crore through PNB Loan Point (PLP) in respect of Retail, Agriculture and MSME segments. Mid Corporate Centres (MCC) shall sanction corporate loans above 1 crore upto 10 crore. Corporate Banking Branches (CBBs) shall handle Non Retail Credit proposals above Rs. 10 Crores. LCB & ELCBs for loans above 50 crores has been put in place. All loan proposals falling under the powers of MCC, Circle Office, Zonal Office and Head office are considered by Credit approval Committees.

2.1.3 Bank has developed comprehensive risk rating system that serves as a single point indicator of diverse risk factors of counterparty and for taking credit decisions in a consistent manner. The risk rating system is drawn up in a structured manner, incorporating different factors such as borrower's specific characteristics, industry specific characteristics etc. Risk rating system is being applied to the loan accounts with total limits above Rs.100 Lacs w.e.f. 07.05.2022. Bank is undertaking periodic validation exercise of its rating models and also conducting migration and default rate analysis to test robustness of its rating models.

Small & Medium Enterprise (SME), Retail advances and lending to agriculture are subjected to scorecard assessment which support "Accept/ Reject" decisions based on the scores obtained. All eligible SME, Retail loan and Agriculture lending applications are necessarily to be evaluated under score card system. Further, bank has developed score cards for evaluating lending proposals under co-lending arrangement, digital lending and credit cards.

Recognizing the need of technology platform in data handling and analytics for risk management, the bank has placed rating/ scoring systems at central server network. All these models can be accessed by the users 'on line' through any office of the bank.

For monitoring the health of borrowal accounts at regular intervals, bank has put in place a tool called PNB SAJAG - Early Warning Signal + Preventive Monitoring System (EWS+PMS) for detection of early warning signals to address the issue of monitoring of causes of build-up of stress in assets with a view to prevent/minimize the loan losses.

2.1.4 Bank has implemented enterprise-wide data warehouse (EDW) project, to cater to the requirement for the reliable and accurate historical data base and to implement the sophisticated risk management solutions/ techniques and the tools for estimating risk components {PD (Probability of Default), LGD (loss Given Default), EAD (Exposure at Default)} and quantification of the risks in the individual exposures to assess risk contribution by individual accounts in total portfolio and identifying buckets of risk concentrations.

2.1.5 As an integral part of Risk Management System, bank has put in place a well-defined Loan Review Mechanism (LRM). This helps bring about qualitative improvements in credit administration. A separate Division known as Credit Audit & Review Division has been formed to ensure LRM implementation.

2.1.6 The risk rating and vetting process is done independent of credit appraisal function to ensure its integrity and independency. The rating category wise portfolio of loan assets is reviewed on quarterly basis to analyze mix of quality of assets etc.

2.1.7 The bank has implemented the Standardized Approach of credit risk as per RBI guidelines and further we are in the process of adoption of Internal Rating Based Approaches (IRB). Bank has received approval from RBI for adoption of Foundation Internal Rating Based Approach (FIRB) on parallel run basis w.e.f. 31.07.2013. Further, bank has placed notice of intention to RBI for implementing Advanced Internal Rating Based (AIRB) approach for credit risk.

Major initiatives taken for implementation of IRB approach are as under:

- For corporate assets class, bank has estimated PD based upon model wise default rates viz. Large Corporate and Mid Corporate borrowers using Maximum likelihood estimator (MLE). For retail asset class, PD is computed for identified homogeneous pool by using exponential smoothing technique.

- LGD (Loss Given Default) values have been calculated by using workout method for Corporate Asset Class as well as for each homogenous pool of Retail Asset Class.

- Bank has also put in place a mechanism to arrive at the LGD rating grade apart from the default rating of a borrower. The securities eligible for LGD rating are identified facility wise and the total estimated loss percentage in the account is computed using supervisory LGD percentage prescribed for various types of collaterals and accordingly LGD rating grades are allotted.

- Mapping of internal grades with that of external rating agencies grades: Bank has mapped its internal rating grades with that of external rating agencies grades. This exercise helps in unexpected loss calculation and PD estimation.

- Benchmarking of Cumulative Default Rates: Benchmark values of cumulative default rates for internal rating grades have been calculated based on the published default data of external rating agencies. The benchmark values is used for monitoring of cumulative default rates of internal rating grades and PD validation.

- Bank has adopted supervisory slotting criteria approach for calculation of capital under specialised lending (SL) exposure falling under corporate asset class.

- Bank has put in place a comprehensive "Credit Risk Mitigation & Collateral Management Policy", which ensures that requirements of FIRB approach are met on consistent basis.

2.2 Market Risk

2.2.1 The investment policy covering various aspects of market risk attempts to assess and minimize risks inherent in treasury operations through various risk management tools. Broadly, it incorporates policy prescriptions for measuring, monitoring and managing systemic risk, credit risk, market risk, operational risk and liquidity risk in treasury operations.

2.2.2 Besides regulatory limits, the bank has put in place internal limits and ensures adherence thereof on continuous basis for managing market risk in trading book of the bank and its business operations. Bank has prescribed entry level barriers, exposure limits, stop loss limits, VaR limits, Duration limits and Risk Tolerance limit for trading book investments. Bank is keeping constant track on Migration of Credit Ratings of investment portfolio. Limits for exposures to Counterparties, Industry Segments and Countries are monitored. The risks under Forex operations are monitored and controlled through Stop Loss Limits, Overnight limit, Daylight limit, Aggregate Gap limit, Individual Gap limit, Value at Risk (VaR) limit, Inter-Bank dealing and investment limits etc.

2.3 Operational Risk

(i) Qualitative Disclosures:

Operational Risk:

Basel Committee and subsequently RBI have defined Operational Risk (OR) as “the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events”. This definition includes legal risk, but excludes strategic and reputational risk. The bank has also adopted the same definition for management of operational risk within the bank. The Bank has put in place Board approved policy with clearly defined roles and responsibilities to mitigate operational risk arising out of the Bank’s business and operations. The bank adopts three lines of defense model for management of operational risk.

First line of defence is the Business Divisions These Divisions being owner of various banking activities, take up management of operational risks within their owned activities, undertake actions for management/mitigation of these risks and take any business line/division level decisions with respect to operational risk. They propagate Operational Risk Management (ORM) policies as laid down by the Board. They analyze the findings of Risk & Control Self- Assessment (RCSA), Key Risk Indicators (KRI) & loss events and initiate action for strengthening of internal processes, management/ mitigation of Operational Risk and explore use of insurance and other mitigating options.

Second Line of defence is Risk Management Division which is responsible for framing the Operational Risk Framework/Policy and ensuring implementation thereof. Operational Risk Management Division acts as a repository of Operational Risk Loss Data Base, KRIs, RCSA Surveys results, Scenario Analyses and used the same for root cause analyses, Operational Risk Management and Measurement. Certain information collected and published by Control Units like Inspection & Audit Division, Management Audit & Review Division, Fraud Risk Management Division and Security Department etc. are used to identify, control, monitor and mitigate the operational risk at Bank wide level. Separate division has been created, presently Mission Parivartan Division, to look into Business Process Reengineering.

Third line of defence is Inspection & Audit Division/ Management Audit & Review Division (IAD/MARD) which are responsible for independent review and validation of Operational Risk Management Framework (ORMF) and Operational Risk Management System (ORMS) at bank wide level.

Governance and Organisational Structure for Managing Operational Risk:

Operational **R**isk **M**anagement **C**ommittee **(ORMC)** headed by Executive Director looking after Integrated Risk Management Division along with all the other EDs and CGMs / GMs of various divisions as members is the Executive level committee to oversee the entire operational risk management of the bank. An independent Operational Risk Management Department (ORMD) is responsible for implementation of ORM ensuring a strong ORM culture and responsibility across the Bank.

For management of operational risks at HO division level, each business line/division has a **R**isk **A**ssessment **C**ommittee **(RAC).** This committee is headed by Divisional Head of the concerned division. The committee identifies the operational risks present in the existing/new products/processes/activities of that business line/division, take corrective/preventive/pre-emptive steps to monitor and control the Operational Risk within the overall framework of the ORM Policy of the Bank.

In order to ensure completeness and correctness of loss data and also to inculcate risk culture deep down the ladder in the Bank, committees named as '**C**hecks **on** **T**hreats to **R**educe **O**p-risk **L**osses (**CONTROL**) and **J**oint **A**ction **Gr**oup on **O**p-risk **C**ontrol (**JAGROC**) have been formed at Circle level and Zonal level respectively which also identify and evaluate the internal and external factors that could adversely affect the achievement of Bank's performance, corporate goals, information system, and compliance objective in the HO guidelines.

Tools to measure & monitor Operational Risk

Internal Control is an essential pre-requisite for an efficient and effective operational risk management. Bank has clearly laid down policies and procedures to ensure the integrity of its operations, appropriateness of operating systems and compliance with the management policies. Established Frameworks/Policies for control and mitigation of operational risk are in place:

1) Operational Risk Management (ORM) policy
2) Policy for Business Continuity Plan (BCP)
3) Policy for Approval of New Product (SoP, Risk Description Charts, Review etc.)
4) Policy for Outsourcing of Financial Services
5) Loss Data Collection Framework
6) Risk & Control Self-Assessment Framework. It's a proactive exercise which helps in identifying control gaps and consequent actions proposed to close the gaps. RCSA is used for identification & mitigation of operational risks, reporting of control deficiencies, monitoring of changes in control environment and assessment of operational risk profile.
7) Business Line Mapping Framework as per Basel defined 8 Business Lines and 7 Loss Event Types.
8) Key Risk Indicator Framework. The indicators have been defined subject to annual review with threshold and monitoring mechanism. These indicators are

metrics/ measures that are derived from various factors to indicate an early warning of or to monitor increasing risk or control failures in an activity.

Table DF- 3: Credit Risk: General Disclosures

Qualitative Disclosures:
(a)

3.1 Any amount due to the bank under any credit facility is overdue if it is not paid on the due date fixed by the bank. Further, an impaired asset is a loan or an advance where:

(i) Interest and/or instalment of principal remains overdue for a period of more than 90 days in respect of a term loan.

(ii) The account remains out of order in respect of an overdraft/cash credit continuously for a period of 90 days.

Account will be treated out of order, if:

- The outstanding balance in CC/OD accounts remains continuously in excess of the sanctioned limit/drawing power for 90 days, or

- The outstanding balance in the CC/OD account is less than the sanctioned limit/drawing power but there are no credits continuously for 90 days, or the outstanding balance in the CC/OD account is less than the sanctioned limit/drawing power but credits are not enough to cover the interest debited during the previous 90 days period (‘Previous 90 days period’ shall be inclusive of the day for which the day-end process is being run).

(iii) In case of bills purchased & discounted, the bill remains overdue for a period of more than 90 days

(iv) The instalment or principal or interest thereon remains overdue for two crop seasons for short duration and the instalment of principal or interest thereon remains overdue for one crop season for long duration crops in case of Agricultural loans.

The classification of an assets as overdue/impaired, reflects the status of an account at the day-end of that calendar date, irrespective of the time of running of such processes.

Credit approving authority, prudential exposure limits, industry exposure limits, credit risk rating system, risk based pricing and loan review mechanisms are the tools used by the bank for credit risk management. All these tools have been defined in the Credit Management & Risk Policy of the bank. At the macro level, policy document is an embodiment of the Bank's approach to understand measure and manage the credit risk and aims at ensuring sustained growth of healthy loan portfolio while dispensing the credit and managing the risk.

Table DF- 4 - Credit Risk: Disclosures for Portfolios Subject to the Standardized Approach

Qualitative Disclosures:

(a)

4.1. Bank has the following seven approved domestic credit rating agencies as on 30.09.2022 accredited by RBI for mapping its exposure with domestic borrowers under standardized approach of credit risk.

- Brickwork
- CARE
- CRISIL
- ICRA
- India Ratings
- Acuite (Erstwhile SMERA)
- INFOMERICS

Bank has also approved the following three international credit rating agencies accredited by RBI in respect of exposure with overseas borrowers.

- FITCH
- Moody’s
- Standard & Poor

These agencies are being used for rating (Long Term & Short Term) of fund based/ non-fund-based facilities provided by the bank to the borrowers. The bank uses solicited rating from the chosen credit rating agencies.

The ratings available in public domain are mapped according to mapping process as envisaged in RBI guidelines on the subject.

Quantitative Disclosures:

(b) For exposure amounts after risk mitigation subject to the standardized approach, amount of a bank's outstanding (rated and unrated) in the following three major risk buckets as well as those that are deducted are as under:

(Rs. in million)

Particulars	30.09.2022
i) Below 100% risk weight exposure outstanding	7203114.35
ii) 100% risk weight exposure outstanding	1404736.05
iii) More than 100% risk weight exposure outstanding	520250.18
iv) Deducted	0.00

Table DF-5: Credit Risk Mitigation: Disclosures for Standardized Approaches

Qualitative Disclosures:

(a)

5.1. Bank has put in place Board approved 'Credit Risk Mitigation and Collateral Management Policy' which, interalia, covers policies and processes for various collaterals including financial collaterals and netting of on and off-balance sheet exposure.

5.2. The collaterals used by the Bank as risk mitigant comprise of the financial collaterals (i.e. bank deposits, govt./postal securities, life policies, gold jewellery, units of mutual funds etc.). A detailed process of calculation of correct valuation and application of haircut thereon has been put in place by developing suitable software.

5.3. Guarantees, which are direct, explicit, irrevocable and unconditional, are taken into consideration by Bank for calculating capital requirement. Use of such guarantees for capital calculation purposes is strictly as per RBI guidelines on the subject.

5.4. Majority of financial collaterals held by the Bank are by way of own deposits and government securities, which do not have any issue in realization. As such, there is no risk concentration on account of nature of collaterals.

Quantitative Disclosures

(Rs. in million)

Particulars	30.09.2022
(b) For each separately disclosed credit risk portfolio the total exposure (after, where applicable, on or off balance sheet netting) that is covered by eligible financial collateral after the application of haircuts.	273156.22
(c) For each separately disclosed portfolio the total exposure (after, where applicable, on or off-balance sheet netting) that is covered by guarantees/credit derivatives (whenever specifically permitted by RBI)	888120.02

Table DF-6: Securitization Exposures: Disclosure for Standardized Approach:
Bank/Group does not have any securitization exposure

Table DF-7: Market Risk in Trading Book

Qualitative Disclosures:
(a)

7.1 RBI prescribed Standardized Measurement Method (duration based) for computation of capital charge for market risk has been adopted by Bank. Being fully compliant with Standardized Measurement Method as per RBI guidelines, now Bank is preparing for the Internal Model Approach (Advanced Approach on Market risk) based on Value at Risk (VaR) model.

Quantitative Disclosures*:*

iv) CDS	0.00
iv) Total capital charge for market risks under Standardized duration approach (i + ii + iii)	37719.01

Table DF-8: Operational Risk

As per RBI directives, the bank has been maintaining capital for operational risk under Basic Indicator approach (BIA) w.e.f. 31.03.2008. The capital requirement as per Basic Indicator Approach (BIA) is Rs. 57,169.30 Millions as on 30.09.2022.

Table DF-9: Interest Rate Risk in the Banking Book (IRRBB)

Qualitative Disclosures:
(a)

9.1 The interest rate risk arises due to fluctuating interest rates on rate sensitive assets and liabilities. For earning perspective, Traditional Gap Analysis (TGA) and for economic value perspective, Duration Gap Analysis (DGA) is carried out to assess the interest rate risk at monthly intervals on both trading book and banking book for domestic and overseas operations, as per RBI guidelines. As per ALM Policy, prudential limits have been fixed for impact on Net Interest Income (NII), Net Interest Margin (NIM), Duration gap and Market Value of Equity for the bank. Moreover, behavioral studies are also being done for assessing and apportioning volatile and core portion of various non-maturity products of both assets and liabilities.

<u>Earning Approach</u>
Since, in case of banks, interest income comprises major part of the income, a standardized rate shock analysis for upward or downward rate movement on the Gap statement is done. Accordingly, Earning at Risk (EaR) for different rate shocks

is done to assess the impact on Net Interest Income (NII) of the bank due to adverse movement of rate of interest.

9.2 Economic Value Approach

The economic value approach involves analyzing the impact on the capital funds due to change in interest rate by 200 bps using Duration Gap Approach. It assesses the intrinsic values of assets and liabilities from time to time thereby improving banks insight into the profile of assets and liabilities vis-a vis contractual rate and market rate. As a prudential measure, a limit has been fixed for net duration gap of the assets and liabilities and the same is monitored at regular interval.

Quantitative Disclosures:
(b)

Earning at Risk: The table reveals the impact of 50 bps adverse change in interest rate on NII as at 30.09.2022.

Change in interest rate	Estimated impact on NII due to adverse change in rate of interest up to 1 year
50 bps	Rs. 7883.63 Million

Economic Value of Equity: The table reveals the impact on Economic Value of Equity for an assumed rate shock of 200 bps on the banking book as at 30.09.2022.

Change in Economic value of Equity	200 bps
	Rs. 66551.85 Million

Table DF-10: General Disclosure for Exposures Related to Counterparty Credit Risk

Qualitative Disclosures:
(a)

The Bank uses derivatives products for hedging its own balance sheet items as well as for trading purposes. The risk management of derivative operation is headed by a senior executive, who reports to top management, independent of the line functions. Trading positions are marked to market on daily basis.

The derivative policy is framed by Integrated Risk Management Division, which includes measurement of credit risk and market risk.

The hedge transactions are undertaken for balance sheet management. Proper system for reporting and monitoring of risks are in place. Policy for hedging and processes for monitoring the same is in place.

Accounting policy for recording hedge and non-hedge transactions are in place, which includes recognition of income, premiums and discounts.

Valuation of outstanding contracts, provisioning, collateral and credit risk mitigation are being done.

Quantitative Disclosures:
(b)

PUNJAB NATIONAL BANK
Pillar 3 Disclosures under Basel III Framework
For 30.09.2022

QUALITATIVE DISCLOSURE ON LIQUIDITY COVERAGE RATIO

The bank has implemented RBI guidelines on Liquidity Coverage Ratio (LCR) from 1st January 2015.

The LCR standard aims to ensure that a bank maintains an adequate level of unencumbered High Quality Liquid Assets (HQLAs) that can be readily converted into cash at little/no loss of value to meet its liquidity needs for a 30-calendar daytime horizon under a liquidity stress scenario.

LCR has two components:

i. The value of the stock of High Quality Liquid Assets (HQLA)–*The Numerator*.

ii. Total Net Cash Outflows: Total expected cash outflows minus Total expected cash inflows, in stress scenario, for the subsequent 30 calendar days - *The denominator.*

Definition of LCR:

Stock of high quality liquid assets (HQLAs) ≥ 100% (w.e.f 01.04.2021)

Total net cash outflows over the next 30 calendar days

The LCR requirement has become binding on the banks with the following minimum required level as per the time-line given below:

	Jan 1, 2015	Jan 1, 2016	Jan 1, 2017	Jan 1, 2018	**Jan 1, 2019**
Minimum LCR	60%	70%	80%	90%	**100%**

For Q2 FY'2022-23, the daily average LCR was 164.11% (based on simple average of daily observations) at consolidated level, as against the regulatory requirement of 100%.

The main drivers of LCR of the bank are High Quality Liquid Assets (HQLAs) to meet liquidity needs of the bank at all times and basic funding from retail and small business customers. The retail and small business customer's contribute about 70.03% of total deposit portfolio of the bank, which attracts low run-off factor of 5/10% as on 30.09.2022.

Composition of High Quality Liquid Assets (HQLA)

HQLAs comprises of Level 1 and Level 2 assets. Level 2 assets are further divided into Level 2A and Level 2B assets, keeping in view their marketability and price volatility.

Level-1assets are those assets which are highly liquid. For quarter ended September 30, 2022, the Level-1 asset of the bank includes Cash in Hand, Excess CRR, Government Securities in excess of minimum SLR, Marketable securities issued or guaranteed by foreign sovereign, MSF and FALLCR totalling to Rs. 2,66,804.19 cr (based on simple average of daily observations).

Level-2A & 2B assets are those assets which are less liquid and their weighted amount comes to Rs. 9486.55 cr (based on simple average of daily observations). Break-up of daily observation Average HQLA during quarter ended Sep,2022 is given hereunder:

High Quality Liquid Assets (HQLAs)	**Average %age contribution to HQLA**
Level 1 Assets	
Cash in hand	**3.27%**
Excess CRR balance	**0.55%**
Government Securities in excess of minimum SLR requirement	**23.53%**
Government securities within the mandatory SLR requirement, to the extent allowed by RBI under MSF (presently to the extent of 2 per cent of NDTL)	**7.56%**
Marketable securities issued or guaranteed by foreign sovereigns having 0% risk-weight under Basel II Standardized Approach	**1.24%**
Facility to avail Liquidity for Liquidity Coverage Ratio – FALLCR (presently to the extent of 16 per cent of NDTL)	**60.42%**
Total Level 1 Assets	**96.57%**
Total Level 2A Assets	**3.26%**
Total Level 2B Assets	**0.17%**
Total Stock of HQLAs	**100.00%**

Concentration of Funding Sources

This metric includes those sources of funding, whose withdrawal could trigger liquidity risks. It aims to address the funding concentration of bank by monitoring its funding requirement from each significant counterparty and each significant product/ instrument. As per RBI guidelines, a "significant counterparty/Instrument/product" is defined as a single counterparty/Instrument/product or group of connected or affiliated counter-parties accounting in aggregate for more than 1% of the bank's total liabilities.

The bank has no significant counterparty (deposits/borrowings) as at 30.09.2022. Top 20 depositors of the bank constitute 3.33% of bank's total Deposit as on Sep 30, 2022. The significant product/ instrument include Saving Fund, Current deposit and Core Term Deposit the funding from which are widely spread and cannot create concentration risk for the bank.

Derivative exposure

The bank has low exposure in derivatives having negligible impact on its liquidity position.

Currency Mismatch

As per RBI guidelines, a currency is considered as “significant” if the aggregate liabilities denominated in that currency amount to 5 per cent or more of the bank’s total liabilities. In our case, only USD (18.12 % of bank’s total liabilities) falls in this criteria whose impact on total outflows in LCR horizon can be managed easily as the impact is not large considering the size of balance sheet of the bank.

Degree of centralization of liquidity management and interaction between group’s units

The group entities are managing liquidity on their own. However, the bank has put in place a group-wide contingency funding plan to take care of liquidity requirement of the group as a whole in the stress period.

PUNJAB NATIONAL BANK
Pillar 3 Disclosures under Basel III Framework
For 30.09.2022

QUALITATIVE DISCLOSURE ON NET STABLE FUNDING RATIO

The Net Stable Funding Ratio (NSFR) and Liquidity Coverage Ratio (LCR) are significant components of the Basel III reforms. The LCR guidelines which promote short term resilience of a bank’s liquidity profile have been issued vide circular DBOD.BP.BC.No.120/21.04.098/2013-14 dated June 9, 2014. **The NSFR guidelines on the other hand ensure reduction in funding risk over a longer time horizon by requiring banks to fund their activities with sufficiently stable sources of funding in order to mitigate the risk of future funding stress.**

In the Indian context, the guidelines for NSFR were effective from October 1, 2021. The NSFR is defined as the amount of available stable funding relative to the amount of required stable funding. “Available stable funding” (ASF) is defined as the portion of capital and liabilities expected to be reliable over the time horizon considered by the NSFR, which extends to one year. The amount of stable funding required ("Required stable funding") (RSF) of a specific institution is a function of the liquidity characteristics and residual maturities of the various assets held by that institution as well as those of its off-balance sheet (OBS) exposures. The run-off factors for the stressed scenarios are prescribed by the RBI, for various categories of liabilities (viz., deposits, unsecured and secured wholesale borrowings), undrawn commitments, derivative-related exposures, and offset with inflows emanating from assets maturing within the same time period. **The minimum NSFR requirement set out in the RBI guideline for the standalone Bank and for Group effective October 1, 2021 is 100%.**

The PNB on a consolidated basis at 30th Sep, 2022 maintained Available Stable Funding (ASF) of ₹ 1135634 Crore against the RSF requirement of ₹ 820547 crore. The NSFR for the quarter ended Sep 30, 2022 was at 138.40%.

The Available Stable Funding (ASF) is primarily driven by the total regulatory capital as per Basle III Capital Adequacy guidelines stipulated by RBI and deposits from retail customers, small business customers and non-financial corporate customers. Under the Required Stable Funding (RSF), the primary drivers are unencumbered performing loans with residual maturities of one year or more.

Table DF-13: Main Features of Regulatory Capital instruments

Disclosure template for main features of regulatory capital instruments – Sept'2022		
1	Issuer	Punjab National Bank
2	Unique identifier (e.g. CUSIP, ISIN or Bloomberg identifier for private placement)	INE160A01022
3	Governing law(s) of the instrument	Applicable Indian Statutes and Regulatory requirements
	Regulatory treatment	
4	Transitional Basel III rules	Common Equity Tier 1
5	Post-transitional Basel III rules	Common Equity Tier 1
6	Eligible at solo/group/ group & solo	Solo and Group
7	Instrument type	Equity - common Share
8	Amount recognised in regulatory capital (Rs. in	22022.03

	million, as of most recent reporting date)	
9	Par value of instrument	Rs.2/- per share
10	Accounting classification	Equity Capital
11	Original date of issuance	19.07.1969 and various dates thereafter
12	Perpetual or dated	Perpetual
13	Original maturity date	Not Applicable
14	Issuer call subject to prior supervisory approval	Not Applicable
15	Optional call date, contingent call dates and redemption amount	Not Applicable
16	Subsequent call dates, if applicable	Not Applicable
	Coupons / dividends	Dividends
17	Fixed or floating dividend/coupon	Floating Dividend
18	Coupon rate and any related index	Not Applicable
19	Existence of a dividend stopper	Not Applicable
20	Fully discretionary, partially discretionary or mandatory	Full Discretionary
21	Existence of step up or other incentive to redeem	Not Applicable
22	Noncumulative or cumulative	Non-cumulative
23	Convertible or non-convertible	Not Applicable
24	If convertible, conversion trigger(s)	Not Applicable
25	If convertible, fully or partially	Not Applicable
26	If convertible, conversion rate	Not Applicable
27	If convertible, mandatory or optional conversion	Not Applicable
28	If convertible, specify instrument type convertible into	Not Applicable
29	If convertible, specify issuer of instrument it converts into	Not Applicable
30	Write-down feature	No
31	If write-down, write-down trigger(s)	Not Applicable
32	If write-down, full or partial	Not Applicable
33	If write-down, permanent or temporary	Not Applicable
34	If temporary write-down, description of write-up mechanism	Not Applicable
35	Position in subordination hierarchy in liquidation (specify instrument type immediately senior to instrument)	Subordinate to all other creditors
36	Non-compliant transitioned features	Not Applicable
37	If yes, specify non-compliant features	Not Applicable

29	If convertible, specify issuer of instrument it converts into	NA	NA	NA	NA	NA
30	Write-down feature	Yes	Yes	Yes	Yes	Yes
31	If write-down, write-down trigger(s)	if CET1 falls below 6.125% of RWA the trigger level referred to herein above is called as "Pre specified Trigger Level".	if CET1 falls below 6.125% of RWA the trigger level referred to herein above is called as "Pre specified Trigger Level".	if CET1 falls below 6.125% of RWA the trigger level referred to herein above is called as "Pre specified Trigger Level".	if CET1 falls below 6.125% of RWA the trigger level referred to herein above is called as "Pre specified Trigger Level".	Occurrence of the trigger event, called the 'Point of Non-Viability (PONV) Trigger' stipulated below: (i)The PONV Trigger event is the earlier of a. a decision that a write-off without which the firm would become non-viable, is necessary, as determined by the Reserve Bank of India; and the decision to make a public sector injection of capital, or equivalent support,without which the firm would have become non-viable, as determined by the relevant authority. However,the Write-off of any Common Equity Tier 1 capital shall not be required before the write off of any Tier 2 regulatory capital instrument. (ii) Such a decision would invariably imply that the write-off consequent upon the trigger event must occur prior to any public sector injection of capital so that the capital provided by the public sector is not diluted. As such, the contractual terms and conditions of these instruments shall not provide for any residual claims on the issuer which are senior to ordinary shares of the bank (or banking group entity where applicable), following a trigger event and when write-off is undertaken.
32	If write-down, full or partial	If fully paid-up Bonds are fully and permanently written-down, they shall cease to exist resulting in extinguishment of a liability of the Bank and thus create CET1	If fully paid-up Bonds are fully and permanently written-down, they shall cease to exist resulting in extinguishment of a liability of the Bank and thus create CET1	If fully paid-up Bonds are fully and permanently written-down, they shall cease to exist resulting in extinguishment of a liability of the Bank and thus create CET1	If fully paid-up Bonds are fully and permanently written-down, they shall cease to exist resulting in extinguishment of a liability of the Bank and thus create CET1	Fully or partialy as per discretion of RBI
33	If write-down, permanent or temporary	The temporary or permanent write-down of Bonds must generate CET1 under applicable Indian Accounting Standards. The Bonds shall receive recognition in AT1 capital only up to the extent of minimum level of CET1 generated by a full write-down of the Bonds.	The temporary or permanent write-down of Bonds must generate CET1 under applicable Indian Accounting Standards. The Bonds shall receive recognition in AT1 capital only up to the extent of minimum level of CET1 generated by a full write-down of the Bonds.	The temporary or permanent write-down of Bonds must generate CET1 under applicable Indian Accounting Standards. The Bonds shall receive recognition in AT1 capital only up to the extent of minimum level of CET1 generated by a full write-down of the Bonds.	The temporary or permanent write-down of Bonds must generate CET1 under applicable Indian Accounting Standards. The Bonds shall receive recognition in AT1 capital only up to the extent of minimum level of CET1 generated by a full write-down of the Bonds.	These instruments are subject to permanent write-off upon the occurrence of the trigger event called PONV as determined by Reserve Bank of India.

34	If temporary write-down, description of write-up mechanism	original Bonds may not be fully extinguished. The par value of the Bonds may be written-down (decrease) on the occurrence of the trigger event and may be written-up (increase) back to its original value in future in conformity with provisions of the RBI Basel III Guidelines. The amount shown in the balance sheet subsequent to temporary write-down may depend on the features of the Bonds and the prevailing Accounting Standards.	original Bonds may not be fully extinguished. The par value of the Bonds may be written-down (decrease) on the occurrence of the trigger event and may be written-up (increase) back to its original value in future in conformity with provisions of the RBI Basel III Guidelines. The amount shown in the balance sheet subsequent to temporary write-down may depend on the features of the Bonds and the prevailing Accounting Standards.	original Bonds may not be fully extinguished. 	feature					
31	If write-down, write-down trigger(s)	If the CET1 of the Bank falls below 5.50% of RWA before April 01, 2021 and if CET1 falls below 6.125% of RWA from April 01, 2021, each of the trigger level referred to herein above is called as “Pre specified Trigger Level”.	Occurrence of the trigger event, called the ‘Point of Non-Viability (PONV) Trigger’ stipulated below: (i)The PONV Trigger event is the earlier of a. a decision that a write-off without which the firm would become non-viable, is necessary, as determined by the Reserve Bank of India; and the decision to make a public sector injection of capital, or equivalent support,without which the firm would have become non-viable, as determined by the relevant authority. However,the Write-off of any Common Equity Tier 1 capital shall not be required before the write off of any Tier 2 regulatory capital instrument. (ii) Such a decision would invariably imply that the write-off consequent upon the trigger event must occur prior to any public sector injection of capital so that the capital provided by the public sector is not diluted. As such, the contractual terms and conditions of these instruments shall not provide for any residual claims on the issuer which are senior to ordinary shares of the bank (or banking group entity where applicable), following a trigger event and when write-off is undertaken.	Occurrence of the trigger event, called the ‘Point of Non-Viability (PONV) Trigger’ stipulated below: (i)The PONV Trigger event is the earlier of a. a decision that a write-off without which the firm would become non-viable, is necessary, as determined by the Reserve Bank of India; and the decision to make a public sector injection of capital, or equivalent support,without which the firm would have become non-viable, as determined by the relevant authority. However,the Write-off of any Common Equity Tier 1 capital shall not be required before the write off of any Tier 2 regulatory capital instrument. (ii) Such a decision would invariably imply that the write-off consequent upon the trigger event must occur prior to any public sector injection of capital so that the capital provided by the public sector is not diluted. As such, the contractual terms and conditions of these instruments shall not provide for any residual claims on the issuer which are senior to ordinary shares of the bank (or banking group entity where applicable), following a trigger event and when write-off is undertaken.	If a PONV Trigger Event (as described below) occurs, the Issuer shall: (i) notify the Trustee; (ii) cancel any coupon which is accrued and unpaid on the Bonds as on the write-off date; and (iii) Without the need for the consent of Bondholders or the Trustee, write-off the outstanding principal of the Bonds by such amount as may be prescribed by RBI (“PONV Write-Off Amount”) and as is otherwise required by the RBI at the relevant time. The Issuer will affect a write-off within thirty days of the PONV write-off Amount being determined and agreed with the RBI. Once the principal of the Bonds have been written off pursuant to PONV Trigger Event, the PONV written-off Amount will not be restored in any circumstances, including where the PONV Trigger Event has ceased to continue. The Bonds at the option of the RBI, shall be permanently written off upon occurrence of the trigger event called the “Point of Non Viability Trigger”. The PONV Trigger event shall be the earlier of: a) a decision that the permanent write off, without which the Bank would become nonviable, is necessary, as determined by the Reserve Bank of India; and b) the decision to make a public sector injection of capital, or equivalent support, without which the Bank would have become non-viable, as determined by the relevant authority. Such a decision would invariably imply that the write-off consequent upon the trigger event must occur prior to any public sector injection of capital so that the capital provided by the public sector	The PONV Trigger event shall be the earlier of: a) a decision that the permanent write off, without which the Bank would become nonviable, is necessary, as determined by the Reserve Bank of India; and b) the decision to make a public sector injection of capital, or equivalent support, without which the Bank would have become non-viable, as determined by the relevant authority. Such a decision would invariably imply that the write-off consequent upon the trigger event must occur prior to any public sector injection of capital so that the capital provided by the public sector is not diluted. For the purpose of these guidelines, a non-viable bank will be a bank which, owing to its financial and other difficulties, may no longer remain a going concern on its own in the opinion of the Reserve Bank of India unless appropriate measures are taken to revive its operations and thus, enable it to continue as a going concern. The difficulties faced by a bank should be such that these are likely to result in financial losses and raising the Common Equity Tier 1 capital of the bank should be considered as the most appropriate way to prevent the bank from turning non-viable. Such measures may include permanent write off of the Bonds in combination with or without other measures as considered appropriate by the Reserve Bank of India. In rare situations, a bank may also become non-viable due to non-financial problems, such as conduct of affairs of the bank in a manner which is detrimental to the interest of depositors,

					is not diluted. The write-off of any Common Equity Tier -1 Capital shall not be required before the writeoff of any Non-Equity (Additional tier 1 and Tier 2) Regulatory Capital Instrument.	serious corporate governance issues, etc. In such situations raising capital is not considered a part of the solution and therefore, may not attract provisions of this framework.
32	If write-down, full or partial	If fully paid-up Bonds are fully and permanently written-down, they shall cease to exist resulting in extinguishment of a liability of the Bank and thus create CET1	Fully or partialy as per discretion of RBI	Fully or partialy as per discretion of RBI	Fully or partialy as per discretion of RBI	Fully or partialy as per discretion of RBI
33	If write-down, permanent or temporary	The temporary or permanent write-down of Bonds must generate CET1 under applicable Indian Accounting Standards. The Bonds shall receive recognition in AT1 capital only up to the extent of minimum level of CET1 generated by a full write-down of the Bonds.	These instruments are subject to permanent write-off upon the occurrence of the trigger event called PONV as determined by Reserve Bank of India.	These instruments are subject to permanent write-off upon the occurrence of the trigger event called PONV as determined by Reserve Bank of India. 28	If convertible, specify instrument type convertible into	NA	NA	NA
29	If convertible, specify issuer of instrument it converts into	NA	NA	NA
30	Write-down feature	NA	NA	Yes
31	If write-down, write-down trigger(s)	NA	NA	The bonds issued before March 31, 2019 shall have two pre-specified triggers. A lower pre-specified trigger at CET1 of 5.5% of RWAs shall apply and remain effective before March 31, 2019. From this date, the trigger shall be raised to CET1 of 6.125% of RWAs for all such bonds. Bonds issued on or after March 31, 2019 shall have pre-specified trigger at CET1 of 6.125% of RWAs only.
32	If write-down, full or partial	NA	NA	If fully paid-up Bonds are fully and permanently written-down, they shall cease to exist resulting in extinguishment of a liability of the Bank and thus create CET1
33	If write-down, permanent or temporary	NA	NA	The temporary or permanent write-down of Bonds must generate CET1 under applicable Indian Accounting Standards. The Bonds shall receive recognition in AT1 capital only up to the extent of minimum level of CET1 generated by a full write-down of the Bonds.

34	If temporary write-down, description of write-up mechanism	NA	NA	original Bonds may not be fully extinguished. The par value of the Bonds may be written-down (decrease) on the occurrence of the trigger event and may be written-up (increase) back to its original value in future in conformity with provisions of the RBI Basel III Guidelines. The amount shown in the balance sheet subsequent to temporary write-down may depend on the features of the Bonds and the prevailing Accounting Standards.
